- Easily and quickly removes smoke deposits resulting from the combustion of coal and heating oil, rust, sulfur, algae, etc.
- Does not require brushing, suitable also for machine cleaning of greenhouses
- Cheapest and most efficient solution on the Polish market
- Available in three different packages: 5l, 10l and 20l
- Depending on glass stain, Sunglass should be diluted in pure water at a ratio of 1:10-15. Apply solution to the cleaned surface with a fine spray. After a while (i.e. when solution starts to work) rinse with plenty of water. Do not allow to dry!
- During long-term use, there has been no negative impact on the glass and construction of greenhouses
- 20-liter jerrycan lasts for about 1500m2 of glass
- Greenhouse cleaning is very important since each percentage of stained glass affects the crop yield and impedes the growth and proper development of plants

REMOVES ALL DIRT INSIDE AND OUTSIDE THE GREENHOUSE WITHOUT BRUSHING
